## To Whom It May Concern

It gives me great satisfaction to recommend Sintayehu Haile. I have known him as a student of Jimma institute of Technology / faculty of Electrical and computer engineering under power stream. I, as an Instructor, taught his batch the courses and he performed and scored well in the courses and also advised him during mini project.

While he was a student, he was very active, attentive, and intelligent which resulted in his being one of the best students among his batch. What is special about Sintayehu is his enthusiasm and industriousness he shows to propose solutions and solve real time problems related to Electrical Engineering disciplines. As my observation, he has been showing interest in learning and believes in hard work.

I have realized that Sintayehu is self-confident, active participant and dynamic in the endeavor of adopting new technologies. The performances he made previously have revealed that he has excellent creative, communication and judgment skills. What strikes me most all the time is his multisided personality. He is a very good at almost everything he is not only a capable academician he is also gifted to work as a team.

I am, therefore, confident enough that his academic preparation, coupled with his strong motivation and conscientious effort to develop personally, will be valuable assets in his feature work and studies. Hence I strongly recommend him as he can overcome any challenge related with his feature endeavor. If you have any questions or need further information please do not hesitate to contact me.

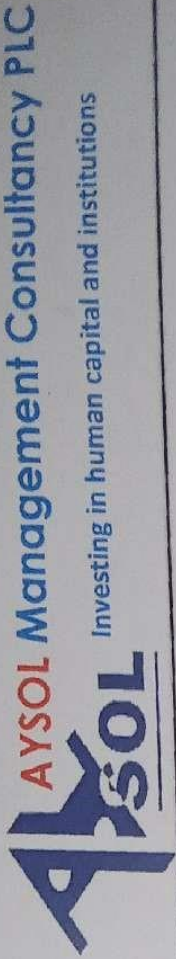

With best regards
